

## PFM CONTROLLED, STEP-UP DC/DC CONVERTERS (VARIABLE DUTY RATIO)

### ■ DESCRIPTION

The UTC UC3383 Series are PFM step-up DC/DC switching converter. The UTC UC3383 can support both large and small currents. It automatically switches duty ratio (45%/75%) when it senses changes in load.

Both built-in and external transistor types include 5-pin and 3-pin packages, which are provided with either a CE (chip enable) function that reduces power consumption during shut-down mode, or a V<sub>DD</sub> pin function (separated power and voltage detect pins).

### ■ FEATURES

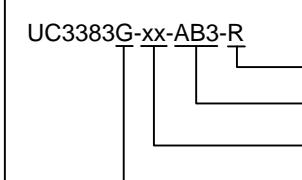

- \* Output Voltage Range: 2.0V~7.0V in 0.1V Increments
- \* Operating (Start-up) Voltage Range: 0.9V~10V
- \* Highly Accurate: Set-up Voltage  $\pm 2.5\%$
- \* Maximum Oscillator Frequency (Max Fosc1): 180kHz ( $\pm 15\%$ )
- \* Variable Duty Ratio: 45%/75% ( $\pm 5\%$ )
- \* Both Switching Transistor Built-in and External Types are Available
- \* 5-Lead Package Offer Chip Enable or Independent V<sub>OUT</sub> Pin Option.
