CMOS IC

## 300mA LDO REGULATOR

### ■ DESCRIPTION

The UTC **LR9282** is a typical LDO (linear regulator) with the features of high output voltage accuracy, low supply current, low ON-resistance. Internally, there're many functions of UTC **LR9282** which can be seen in the block figure. There are a voltage reference unit, an error amplifier, resistor-net for voltage setting, a current limit circuit, and a chip enable circuit in each UTC **LR9282**.

The output voltage of these ICs is fixed with high accuracy.

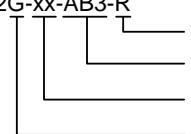

### ■ FEATURES

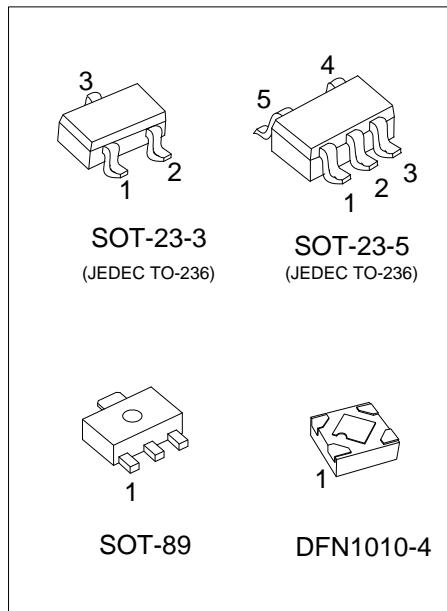

- \* Supply current (TYP=1μA)
