HIGH POWER FACTOR LINEAR CONSTANT CURRENT LED DRIVER

HSOP-8

■ DESCRIPTION

UTC **UL52B** is a high power factor linear constant current LED driver which is applied to LED lighting. Through the distinctive constant current control technology, it realizes that constant current accuracy is less than ±5% and output current is adjustable through external resistor. High power factor and low harmonic distortion are the particular features.

The system is simple without transformer and electrolysis capacitor. Therefore, LED lighting batch job can be realized.
■ FEATURES

* No transformer and high voltage electrolysis capacitor

■ FUNCTIONAL DESCRIPTION

UTC **UL52B** is constant current drive which integrates the functional module such as LED constant current control and OUT port high voltage drive. OUT1 port minimum input voltage is 6V （I_{OUT}=20mA）and it can reach output current 10mA~60mA by external REXT resistor. Built-in LED constant current drive maintains LED current a high precision without impact of ambient temperature. The chip can achieve high efficiency and high power factor by opening four switches one by one.

The chip output current is adjustable by REXT resistor I_{OUT}=V_{REXT}/R. Output current generated by four switches opening one by one is shown below:

I_{OUT1}=0.56V/R
I_{OUT2}=0.70V/R
I_{OUT3}=0.84V/R
I_{OUT4}=0.91V/R
